

ADVANCED FLIGHT SPRAY

Flight Spray Advanced is the first natural nasal hydration spray formulated especially for airline travelers and has been used by travelers for over 20 years. Now - more powerful than ever, Flight Spray ADVANCED is used to moisten the nasal passages and alleviate nasal dryness.

This new natural nasal spray is formulated by combining three of the most effective herbal ingredients (Turmeric root, Spearmint and Lime) used in the treatment of nasal ailments. It helps to relieve the symptoms associated with common colds & chronic sinusitis. The ingredients provide an unsuitable environment for germs and viruses to reproduce. Effective at the first signs of nasal dryness, Flight Spray can be used on the go, while traveling, in a crowd or anytime natural nasal relief is desired.

It helps soothe nasal irritation, sore throats, allergies and headaches. **Flight Spray** helps to enhance the body's ability to heal and clear the sinuses. These ingredients provide an environment for healing relief. Effective at the first signs of nasal distress,

Flight Spray was formulated for those concerned with nasal dryness and the potential to catch colds, flu and sore throats due to the close proximity to those who have transmittable symptoms. Flight Spray enhances the body's immune ability to fight against infection, moistens the nasal passages in dry airplane cabin environments and clears the sinuses during long flights. It is especially effective while traveling, in a crowd, or at close proximity to people with cold or flu symptoms.

Turmeric Root acts as a natural anti-bacterial and anti-fungal agent. It has a soothing action on respiratory ailments such as coughs and asthma.

Spearmint is a natural antiseptic & restorative herb used in the treatment of fever, bronchitis, chills, common colds and nasal congestion. It helps to clear mucous from the lungs & restore normal breathing.

Lime (*Citrus aurantifolia*) is known to be an antiseptic, antiviral and is used to cool fevers. It is also known to relieve congestion due to mucus formation.
